

C - SWITCH

SWITCH STATEMENTS

```
char c = 'h';

switch(c) {
    case '+':
        // some command
        break; // only if not enter rest
    case 'h':
        // some other command
        break; // only if not enter rest
    default:
        // yet another command
}
```
